## Question 1.

Including plots in R markdown.

## Question 2.

Including a table in R markdown.

Table 1: Contingency table of whether results were collected by whether the participant recieved an incentive.

|                        | Incentive | No Incentive |
|------------------------|-----------|--------------|
| Collected Result       | 1743      | 211          |
| Did Not Collect Result | 461       | 410          |

## Question 3.

Here is an example of using R output in an answer.

We estimate that someone who received an incentive has 7.35 (95% CI: 6.05 - 8.94) times the odds of collecting their HIV test results compared to someone who did not receive an incentive.
